Philosophy

"Creating Happiness"

Yamadai Food Corporation is the kind of company that makes Okazu – Japanese dishes – you eat every day, and so it's really important to us that these dishes are the highest quality.

Of course we consider the key factors of nutrition, health, and – above all else- safety.

Yet in addition to all this, there's one more thing that we place equal emphasis on:

"Food is "The Seed" that bears happiness among people".

Good food is something that melts the one's heart and warms the entire family.

It can also strengthen your relationship with that special someone.

Finally, it can help lead to a nicer society overall.

Our corporate philosophy at Yamadai Food Corporation is "Creating Happiness".

To live up to it, we keep in mind that we spread "The Seed" to provide "happiness" through our products.
